

ČILIP I – RADOVČIĆ I

Na ovom dijelu tzv. Donje bande izmjenjuju se crnogorične šume bora i čempresa s obradivim krškim udolinama i vinogradima. Sela Donje bande sa sačuvanom tradicionalnom arhitekturom kamenih kuća tipični su primjeri sačuvane konavoske ruralne arhitekture. Zanimljiva su i po kominatama, zaštićenim spomenicima autohtonog konavoskog graditeljstva. Kominate ili pušnice su žbukom obložena kamena piramidalna krovišta nad kućnim ognjištima, građena posebnom tehnikom, bez bilo kakvih drugih učvršćenja.

Središnji dio konavoske obale zauzima ju Konavoske stijene. Pogled u kojem možete uživati sa vrha tih stijena pruža se prema otvorenom moru i zelenim pejzažima Konavala i kao takav predstavlja jedinstven doživljaj. Plaža Pasječa u selu Popovići jedna je od rijetkih šljunčanih plaža na ovom području.

In this part of so called Donja Banda (Lower side) of Konavle coniferous forests with pine and cypresses alternate with cultivable karst valleys and vineyards.

The villages of the Donja banda, with their preserved traditional architecture of stone houses, are typical examples of the maintained architecture of Konavle. They are also known for its „kominate“ or drying chambers, preserved monuments of the autochthonous Konavle construction mode. The „kominate“ are mortal plastered, pyramidal roof frames above the domestic fireplaces built in a special technique, without any additional fixation.

The central part of Konavle coastal region is captured by the konavle rocks. The view you can enjoy in from the top of the rocks extends toward the open sea and green landscapes of Konavle and, as such, represents a unique experience. Beach Pasječa in the village of Popovići is one of the few pebble beaches in this area.
